Celebrating Success - VISION

"Last year as I sat in the audience at the Winning Futures scholarship event, watching my classmates accept their scholarships, I visioned myself winning a scholarship my senior year. Here I am today...dreams do come true, and it feels GREAT!"

~Cynthia - Community High School 2009 Graduate and Winning Futures Scholarship Recipient

Winning Futures Principles in the Workplace

When I first learned about Winning Futures, I knew this was something I wanted to do. I have now completed my first full year of mentoring. The Winning Futures workbook we use in class is so well organized that it's easy to follow along and be prepared each week. I could not help but apply the workbook concepts to other aspects of my life.

I am the owner/President of a computer consulting firm. We've been in business for over 13 years and are always looking for new ways to learn and grow. As I worked with my mentees week after week, I began to think: why can't I apply these same aspects to our business. Identifying strengths and talents as well as challenges really helped us determine the best direction for the future of the company. Setting goals, starting with short term (six week) and looking ahead to the future (one year, five year) really made great sense and gave us specific steps to accomplish week after week.

Even as things change with our customers, the industry, employee circumstances, etc. and we need to re-evaluate these goals, it really helps to have a clear vision. It's something to measure and is easier to stay on track when you can picture the outcome you are working towards.
