"As a mentor in the program I can attest first hand that mentoring and Winning Futures has a strong positive impact on students. The group of girls I mentor come every week excited and energized to participate in the program. This shows me that they now feel
comfortable in setting professional and academic goals and they thrive to work towards accomplishing them. Planning their future isn’t a “scary” process anymore now that they have the knowledge and confidence to do so, and it’s all because of the Winning Futures program."

Lauren B. McDowell - Winning Futures Mentor

From the Principals Desk

Winning futures mentors have had a long lasting, positive impact on the culture and daily life at Warren Mott High School. I have been involved with this outstanding program for about 15 years, and have listened over and over again to the positive experiences that students have with their mentors. More than that, I have witnessed the socially moving experiences that the mentors have had while learning from the students.

As a mentor you will find it is not about the daily meetings that occur during our sessions each week, but rather the relationship you have built with the students over the years, and their successes you share in. I thank you for filling this important role within our school. You are making a positive difference in the lives of young adults.
